

T200

Boost growth through profitable tinting and easy service

The T200 turntable paint dispenser sets a new benchmark for in-store tinting performance, accommodating large 4.3-liter canisters while maintaining an ultra-compact footprint. Designed for retail environments with medium to low productivity needs, its 0.5 L/min flow rate ensures efficient dispensing.

At the heart of the T200 is the NoPurge Piston Pump, a cutting-edge tinting technology that eliminates the need for daily purging. This innovation reduces colorant waste and mistints, streamlining operations and boosting overall efficiency. Complementing this is the exclusive AirClear system, which accelerates de-airing during both commissioning and refills. The result? A seamless start-up, consistent performance, and the confidence that your dispenser is truly ready for business.

Designed for ease of use, the T200 features an ergonomic layout that supports daily workflows. It offers easy access to canisters and includes a manually adjustable shelf capable of holding paint cans up to 35 kilograms.

Dynamic Speed Control automatically adapts dispensing speed to changes in fluid properties, maintaining accuracy and minimizing errors. The advanced stirring system, with patented variable-section paddles, ensures consistent colorant mixing and prevents sedimentation. Stirring cycles and intervals are fully configurable via software.

Installation and maintenance are simplified through intuitive service features. Copied calibration enables fast, accurate, and repeatable setup. Frontal circuit access and simplified parts replacement—requiring only two screws—make servicing quick and efficient. The piston cylinder can be replaced without major disassembly.

The T200 uses EVOservice for remote support and updates, ensuring reliable service operation.

NO PURGE

NoPurge feature for excellent colorant handling eliminating waste and mistints

ERGONOMIC

Designed to ensure the best user experience in all phases of the dispensing process

READY FOR BUSINESS

AirClear technology, recirculation and copied calibration ensure your machine up & running with minimal delay

VALUE FOR YOUR INVESTMENT

Cost effectiveness, ease of service and high reliability, ensure a rapid return on investment

ABOUT US

COROB, a GRACO company, is a global leader with a long and successful history in developing, manufacturing and delivering high-tech dispensing and mixing solutions for the widest range of tinting applications. Our offering is supported by a global service network making COROB a total solution provider.

T200

Technical data

	[S]	[L]
Business environment	Paint stores and DIYs	
Volume output	Low / Medium	
Dispensing technology	NoPurge Piston pump (NPP)	
Dispensing flow	Sequential turntable (bidirectional)	
Circuit flow rate [l/min]*	0.5	
Minimum dispensed quantity [fl.oz.] (cc)*	1/576 (0.051)	
Valve type	Sphere valve	
Canister configurations	Up to 16	Up to 32
Canister sizes [l] (q-G)	1.5 (1.58) / 2.3 (2.4) / 4.3 (4.5)	
Colorant compatibility	Water, Universal, Solvent	
Dimensions HxLxD [mm] (in)	1325 x 722 x 842 (52.2 x 28.4 x 33.1)	1325 x 840 x 940 (52.2 x 33 x 37)
Footprint [sqm] (sq ft)	0.61 (6.5)	0.79 (8.5)

* Values highly affected by the nature of the colorants and their rheological properties.
Note: Product not for Chinese market.
